MULLAN STORY

Mullan Lighting is a lighting design and manufacturing company based in Ireland. Our name derives from the small village in Ireland in which we continue to create our light fixtures. Mullan, or An Muileann in Irish, translates to 'The Mill'. This is our story.

1924

A shoe factory is established in the old mill and Mullan village is once again a bustling rural centre. The factory employed over 80 people at its height and manufactured the Mill Brand and the Border Brand footwear.

2009

Mullan Lighting is established by Mike Treanor inside the old mill building. At the same time the mill houses in the village are faithfully restored and life is brought back to the village once more.

c1850

A flax mill, with its associated mill race and workers' cottages, is developed on the site in Mullan village. The mill remained operational until the early 20th century.

1978

The shoe factory closes. The nearby border road also closes due to The Troubles in Northern Ireland. The factory would lie idle for the next 30 years. By 1990 most of the mill cottages are abandoned and the village is all but deserted.

2012

Mullan Lighting expands its product range from traditional pub and church lighting to vintage and industrial-style lighting. The company begins to export to the United Kingdom.

Les Innocents, Strasbourg, France by Les Agenceurs © Frederic Godard

2013

Mullan Lighting attends its first international trade show, MAISON&OBJET, in Paris. Subsequent trade shows in Germany, Stockholm and the United Kingdom help establish the Mullan Lighting brand across Europe.

2017

Mullan Lighting now employs 60 people. We complete one of the largest ever outdoor decorative lighting projects in Dubai. Subsequently, we begin to rapidly expand our range of decorative outdoor and bathroom lighting products.

2019

The Mullan Lighting team of experienced designers and crafts people - many of whom live in the restored mill houses of Mullan Village - continues to grow and develop.

2015

Orangeriet, Umeå, Sweden by RHAB

Mullan Lighting's product quality and speed of manufacture becomes recognised more and more. We become the choice lighting supplier for Costa Coffee, Hilton Hotels, the Hard Rock Cafe and Superdry retail stores.

2018

Café en Seine, Dublin, Ireland © Joe Ladrigan

Mullan Lighting completes the manufacture of dozens of bespoke light fixtures for the iconic Café en Seine in Dublin, Ireland. We continue to invest in product development and to expand our range of decorative light fixtures.

2020

We expand our manufacturing premises in Mullan Village to ensure the company's continued growth and success. We continue our focus on quality, new product design and customer service.

DESIGN

Mullan Lighting's in-house design team has a wealth of lighting design experience in the commercial and hospitality sectors. We work closely with clients to understand their initial lighting concept, develop drawings and 3D renders, before producing prototypes, if necessary.

We believe that good design should not only be aesthetically pleasing but should be functional and affordable. We apply this design ethos to every new product that we create.

BESPOKE

Our comprehensive in-house design and manufacturing facilities provides our customers creative freedom to make their interior design truly unique. We offer a complete bespoke lighting service whereby we guide our clients through the entire process, from initial concept to design, the manufacture of samples, if required, to the finished product.

All our standard designs are also fully customisable in terms of colour, size, suspension length etc. to suit any interior design. Our quick turnaround times mean that we always meet project deadlines.

MANUFACTURING

Mullan Lighting is a lighting design and manufacturing company based in Ireland. We have the capacity to manufacture high-volume quantities of a single lighting product and one-off bespoke pieces.

Established in 2009, we combine our abilities in lean manufacturing with creativity from our team of lighting designers to create high-quality light fixtures at an affordable price. The majority of our light fixtures are manufactured for use in the hospitality and commercial sectors.

HOTELS

Mullan Lighting has an impressive and expanding hotel lighting range. Our hotel lights are meticulously designed and prototyped until we're confident that the fixtures are both aesthetically pleasing and accordingly durable.

BARS & RESTAURANTS

Good lighting design is essential for setting mood and tone and creating the correct ambience in bars and restaurants. Our standard lighting range has many fixtures that can be found in bars and restaurants across Europe, the United States and beyond.

SYMBOLS & CERTIFICATIONS

At Mullan Lighting we are proud of the accreditations we have earned to ensure our products are not only manufactured to the highest standards, but are sustainably produced, limiting our impact on the environment around us. Below is a short explanation of some of the symbols and quality assurance marks found on our website and our catalogue.

CE Mark: The CE mark is a mandatory conformity marking for certain products - including light fixtures - sold within the European Economic Area (EEA) and indicates the compliance with EU legislation of a product. It is also found on products that are manufactured in the EEA but sold outside the EEA and is therefore an internationally recognisable symbol of compliance to EU legislation regarding product safety, health, quality and environmental protection. It is similar to the FCC Declaration of Conformity used on certain electronic goods sold in the United States.

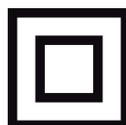

UL Listed: The UL symbol means the product, after a series of testing, meets the UL nationally recognized Standards of Safety. UL is an American non-profit organization dedicated to public safety and Mullan Lighting is proud to have the majority of its products UL listed.

SASO: The Saudi Standards, Metrology and Quality Organisation (SASO) is a standards and conformity authority in Saudi Arabia. Goods being imported into Saudi Arabia must be accompanied by a Certificate of Conformity (CoC). This certification is available on request.

Class I: A Class I (Class 1) appliance is one that must have its body connected to electrical earth by a separate earth conductor. The earth connection is achieved using a 3-core cable.

Class II: A Class II (Class 2) or double insulated electrical appliance (light fixture) is one which has been designed in such a way that it does NOT require a safety connection to electrical earth (ground). An added layer of safety against electrical shock is achieved by using double layers of insulating material or reinforced insulation protecting any live parts of the fitting.

Waterproof Symbol: This water droplets symbol indicates that the product is moisture-resistant and suitable for use in bathrooms and outdoors. The product has a minimum IP rating of IP44 (most are IP54 or greater), meaning it is protected from water spray from any direction.

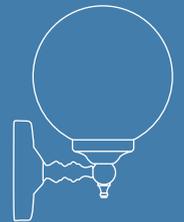

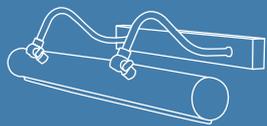

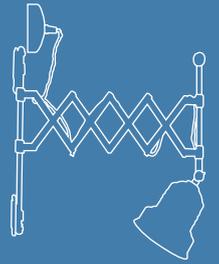

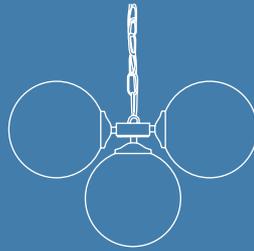

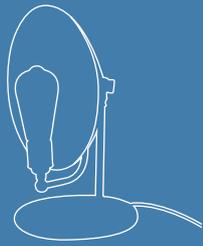

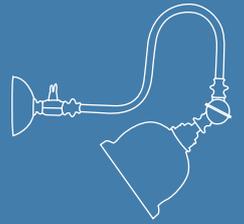

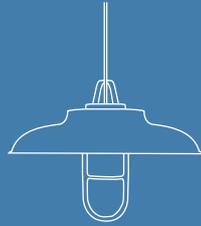

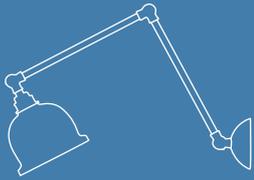

Looking for lighting inspiration?

We love sharing inspiring and interesting projects that feature our products.
