Dentō

by Eloy Puig

The alchemy of the 4 elements: earth, water, fire and air, is present in the creative process of the Dentō collection, which is seven hours long. The traditional Raku-yaki (楽焼) technique brings close to us the Japanese tea ceremony.

La alquimia de los 4 elementos, tierra, agua, fuego y aire, está presente en las casi 7 horas del proceso creativo de la colección Dentō. Nos acerca a la ceremonia japonesa del té, mediante la técnica tradicional de cerámica Raku-yaki (楽焼).

These delicate pendants are individually hand crafted. They are offered in three different diameters and shapes.

Individually, linear, or gathered together on a large circular canopy, at the same or different heights, they create a fresh, emotional and natural environment.

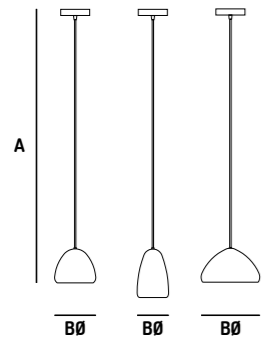

In her pottery workshop, Anna-Katharina conveys her passion for artisanal handicrafts by making each piece a unique work of art.

Estas delicadas lámparas de suspensión, son fabricadas a mano, una a una, en tres diámetros y formas diferentes.

Colocadas en solitario, en línea o reunidas en una gran base circular, a diferente o idéntica altura, crean un ambiente fresco, emocional, natural.

En su taller de cerámica, Anna-Katharina, transmite su pasión por la artesanía haciendo de cada pieza una obra de arte única.

Koord

by Eloy Puig

Since its launch, the Koord line has given life to a variety of environments with its acrylic braided cord shades.

Both indoor and outdoor, it is an explosion of colour, freshness, fun and versatility. It adapts to all kinds of spaces, individually or in groups, combining different lengths and tones.

The table lamp guarantees 7 hours of light at different intensities, which can be remotely modified.

The wall light is designed for installation individually or grouped, either on a wall or the ceiling.

The collection also includes two floor lamp versions: a robust column of light with a strong white concrete base, and the indoor tripod, whose legs are made of natural wood.

Desde su lanzamiento, la línea Koord da vida a muy diversos ambientes con sus pantallas de cordones trenzados acrílicos.

Tanto para exterior como interior, es una explosión de colores, divertida, fresca...Se adaptan a cualquier espacio, como única pieza o agrupadas jugando con diferentes largos y tonos.

Las portátiles, nos regalan 7hs de luz a diferentes intensidades lumínicas que podemos modificar a distancia.

El aplique está pensado para instalarse solo o agrupado. Instalado en el techo se suma al modelo plafón.

Cierran la colección sus dos versiones de pie: una contundente columna de luz con base de "concrete" blanco para exterior y la trípode de madera natural para el interior.

Erol

by Joan Genebat

The mission of this wall light, with the name Erol, is to play with light and generate calm.

Its metal case comes in three finishes (copper, gold and graphite) and two diameters (18 and 23 cm), all with a central oak trim.

From the centre, the LED light source projects emotions through a warm spherical wave.

It is ideal for creating natural compositions on walls. It's a combination of metal, natural wood and ambient light.

Petal

by Eloy Puig

With a floral corolla in mind, Eloy Puig conceived Petal, a hand-shaped flush mount with a methacrylate diffuser and magnetic supports.

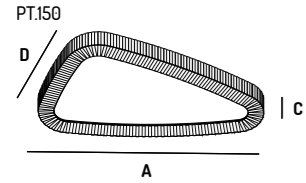

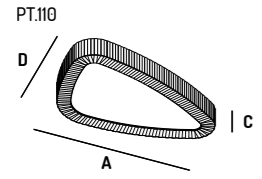

It was designed to be displayed in multiples and thus create unique compositions that scatter the light cleanly and clearly.

On the top plate, the warm white LEDs seeks to optimise light output in large offices and halls but also in homes and smaller studios

Pensando en la corola de una flor, Eloy Puig ideó Petal, un plafón encintado a mano, con difusor en metacrilato y sujeción por imanes.

Ha sido diseñado para repetirse y crear composiciones únicas que difunden la luz de manera limpia y contundente.

En su placa superior los leds de blanco cálido, buscan optimizar la luminosidad tanto en grandes oficinas o halls, como en domicilios o despachos más reducidos.
