THE ART
OF BEING
SLOW

& the design that will outlive us all.

№ 2022

Our story started in 2003 with a photographer named Kent. He was looking for a bedside table that would fit in his shoebox sized Stockholm apartment. As he couldn't find what he was looking for, Kent decided to create one himself:
– The *F-shelf* was born.

From that day a lot has happened.

We've set up a unique production chain including designers, producers and a business team working closely towards the same goal – to create smart, playful and simplistic design that aims for a low impact on the environment

Over the years we have developed a warmth in our Scandinavian brand that appeals not only to frozen locals, but to people all around the globe – thanks to our solid slow produced design.

Slow Production is a guarantee for you, for us and for the world. It involves honest manufacturing, good working conditions, recycled materials and a strict no air freight policy. And we will never lay our hands on endangered forest. We care about the indoors as much as the outdoors and our vision includes a living planet as much as nice design.

Our design will outlive us all!

Always with love,
Maze Interior

Pieces has allowed us to mix the finest leather with metal welded by hand. As our greatest of great furniture, we recommend them to become the centerpieces in your home. **p. 6-27**

The **Bill** collection – a story of how one hook, intended for state libraries, evolved and became a complete storage solution. **p. 28-41**

Nature makes metal come alive! Organic forms in symbiosis with nature, long lasting 100% recycled metal wires. Let's go and expect the unexpected. **p.42-49**

The **Pythagoras** bracket system is a complete extension from the Pythagorean equation; if two sides of a right triangle are known, the length of the third can be revealed. **p. 52-73**

Classic is a signature collection made to fit in everyone's home, no matter the size of it. Made from recycled metal that will last many years, it's a really good investment. **p.74-85**

Graphic is cut out furniture which mimic its purpose. Metal and wood with clean cut lines, straight from the drawing board to your home. Let's keep it simple. **p. 86-97**

The **City** collection contours houses, skyscrapers, and the grid we live in. It's form enhances the function. **p. 98-108**

Index is where you find everything in all colors. **p. 109-116**

Our collections
are the pride and
glory of our work.
Our fine goods
that each have
been designed
and developed
through the good
Slow Production.

Pieces has allowed us to mix the finest leather with metal welded by hand. As our greatest of great furniture, we recommend them to become the center-pieces of your home.

Slow Production in Pieces:

Made out of powder coated metal and naturally tanned leather from *Elmo Leather* in Västergötland. Pieces is hand welded in Småland and this collection is produced in small editions – always made with love and care.

The **Bill** collection
– a story of how
one hook, intended
for state libraries,
evolved and became
shoe shelves,
hat racks, a coat
hanger and seven
other hangers.

Slow Production in Bill:

Made of powder coated recycled metal wire and wooden knobs
from *Larssons Trä* in Småland.

Bill - Now available in walnut hue

Why go wide when you can get high.

The manufacturing process of **Bill XS**.

1. Metal 2.0.

We buy 100% recycled metal from *Gunnars Tråd* in Hillertorp, Småland.

2. Such a Birch!

The birch knobs are from *Larssons Trä* in Tranemo, Västergötland. They work with wood only grown and processed in Sweden.

3. Protected!

Leba, from Hillertorp, Småland, powder coats the metal. Powder coating is one of the most environmental friendly ways to protect metal.

4. Build for the future

Finally the true craftsmen at *Backstigs* in Hillertorp, Småland assemble the hanger. Great working conditions, great people!

Mother of Bill

Louise Hederström is the superdesigner behind the Bill collection. She creates design that will last for generations. Thanks Louise!

Nature makes
metal come alive!
Organic forms in
symbiosis with nature,
long lasting 100%
recycled metal wire.
Let's go and expect
the unexpected.

Slow Production in Nature:

Made of powder coated metal wire that is 100% recycled.
Produced in Småland.

Twig - now in green & yellow.

Our metal is as close to organic grown metal one can come.

WTF is "Slow Production"?

Made with love and care.

When so many are focusing on maximizing profits and shorten production time -we aim to make our design as sustainable as can be; from design, to selection of materials, production and working conditions. We rather develop and improve existing products than come up with new ones. By perfecting piece by piece, we make design that will last for generations. We can't stress this enough: Our design should outlive us all - and so should mother nature.

A local with a global perspective.

96% of our production takes place in Småland, Sweden. We use honest manufacturing, recycled materials and a strict no air freight policy. So when more people outside the cold north like what we are doing, we will do our best to set up production with equal good conditions in said country.

Kind to the environment & the nature.

If our design shall outlive us all - we have to be kind to mother nature. Today we use as much recycled materials as we possibly can and we are always on the search for new sustainable production technics and materials. We never want to over produce, and would rather have a demand we can't meet - so that we can greet a better tomorrow.

Slow Production for a fast world.

The **Pythagoras** bracket system is a complete extension from the Pythagorean equation; if two sides of a right-angled triangle are known, the length of the third can be revealed.

Slow Production in Pythagoras:

This collection is produced in Småland and the Pythagoras brackets are made of 100% recycled metal. The Pythagoras PLAY shelves are made from Nordic sustainable forestry – for every tree used, two new trees are planted.

Pythagoras Shelf & L

Do it yourself.

Here is a crazy idea: A set of shelves as personal as a pasta bolognese. There are as many ways to customize them as there are people in the world. Make it as playful, particular or perfect as you like.

Do Pythagoras PLAY, today.

As smart as a shelf can get

I am made from Nordic, good looking, sustainable forestry. For every tree chopped down, two new trees are being planted. With pre-drilled holes there should be no problem for you to adjust my length from 78 to 59 centimeters. If that ain't smart, I must be stupid!

Pythagoras PLAY (Painted by Sara Garanty)

Do it yourself.

Pythagoras PLAY

<< Pythagoras Shelf & Pythagoras Drawer L

Mountable in 90° corners

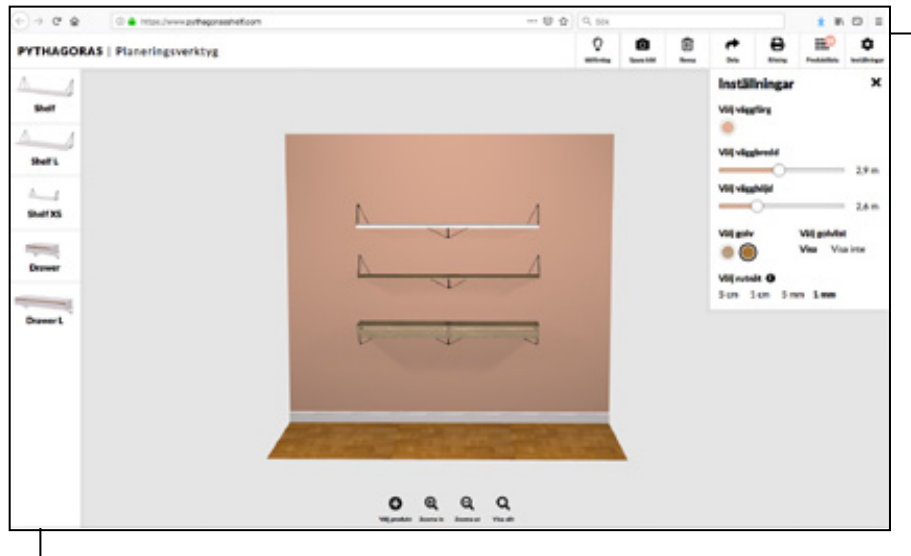

<Pythagoras>

There is no right or wrong. Just two points and a life inbetween.

Combine to find your unique style.

<<Shelf, Shelf L & Drawer L Shelf & Drawer L

Try before you buy!

At **Pythagoras LAB** you can build your shelf system to fit all spaces and needs. It's fun, test it out >> pythagorassshelf.com

Two <> and a world in between.
The Pythagoras bracket system is inspired by the Pythagorean theorem and mathematics has never been this neat.

Play it safe by choosing a shelf in rich walnut or go nuts and create your own ledge out of driftwood. Get more than one to create your unique Pythagoras

shelving system. Combine the shelf with stylish brackets that come in pairs. They are made of recycled powder coated metal wire and are available in white, black, chrome and brass matte.

The Pythagoras shelves have pre-drilled holes, adjusted for the hooks to secure the shelves to the brackets and the wall.

Bracket & Shelf 60, Shelf L >>

Classic is a signature collection made to fit in everyone's home, no matter the size of it. Made from recycled metal that will last many years, it's a really good investment.

Slow Production in Classic:

The Classic collection is made of recycled powder coated metal wire. The products are simple yet functional to create a timeless design that future generations will ask to inherit.

Designers of Maze

Louise Hederström

With an open mind and ambitious mindset, Louise finds inspiration for her designs through her surroundings. Her focus on practical, yet beautiful solutions can be seen in the design of Bill, Frank and Minnie Mae Paper.

Malin Lundmark

Malin constantly manages to surprise us by drawing something which seems super simple and that becomes a product that is loved and holds a high design factor.

Malin has among other things designed Magbag and Suitcase.

Gustav Rosén

Engineer and all round brainstormer with the most ingenious design solutions. With a degree from the Swedish Royal Institute of Technology, one clearly sees the elements of geometry and smart design features in his products. Gustav has designed, among other things, the successful Pythagoras bracket system and the shoe rack, Step.

Olof Kolte

Hat rack and Shoe shelf are designed by Olof. These items will be modern design classics, which now can be found in many homes around the world. Today Olof is a professor at the School of Industrial Design at the University of Lund and teaches with emphasis on long term and sustainable design solutions.

About Álvaro Díaz Hernández

Álvaro is a young award-winning interior and furniture designer from Madrid. Álvaro is passionate about creating furniture adapted to smaller surfaces and his passion can be seen in his work where aesthetics, proportions, materials and form meet. As seen in Uptown and Midtown.

Lotta De Visscher

Lotta is the Creative Director at Maze. With an entrepreneurial spirit and compelling drive, she is a true visionary. Lotta's eye for design and concept is the creative fuel that leads Maze forward and makes the company reach new heights.
